**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Species 1 in the reply filed on 11/7/08 is acknowledged. This is not found persuasive because claims 17-32 do not recite all the limitations of claim 33 and vice versa as stated in the Species requirement.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Conte (US 6,658,726) in view of Long (US 5,740,608).

Conte discloses in Fig. 1 8-11 and 22 of different cable-end processing stations and 22 being a double crimping unit; 5-6 provide cables and belt drives; 7 is the swiveling arm and gripper; Fig. 8 shows a turntable with a belt drive below 46 and 47; 14 is a cable transportation belt, except for Conte's 7 being a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length.

U.S. Patent

Dec. 9, 2003

Sheet 5 of 6

US 6,658,726 B1

5/7/07, EAST Version: 2.5.3.0

Long discloses in Figs. 9-11 a conveyor belt 88 being a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Conte by providing a sole means for holding and moving respectively the leading and trailing cable-ends of the cable length, as taught by Long, for the purpose of making and stacking electrical leads.

### *Response to Arguments*

### *Response to Arguments*

4. Applicant's arguments filed 4/25/08 have been fully considered but they are not persuasive.

The applicant's gripper and swiveling arm are incapable of being "a sole means for . . ." The belt-drive 4 serves to advance a cable 5 from a reel or drum during the cutting and stripping process and the processing by at least one cable-end processing station.

The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

#### ***Interviews After Final***

5. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

#### ***Conclusion***

6. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that

the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
